Secretariat for consideration at the Eight Meeting of the Parties to be held in September, 1996 or later. Applications for essential use exemptions should be submitted to EPA no later than 30 days after the date of publication of this notice to allow time for a review of the information before the deadline for submitting nominations to the Secretariat.

As described previously, the Parties established criteria to identify essential uses and a process to decide which uses would qualify under Decision IV/25. The Decision states that "a use of a controlled substance should qualify as essential only if: (i) it is necessary for the health, safety or is critical for the functioning of society (encompassing cultural and intellectual aspects); and (ii) there are no available technically and economically feasible alternatives or substitutes that are acceptable from the standpoint of environment and health." In addition, the Parties agreed "that production and consumption, if any, of a controlled substance, for essential uses should be permitted only if: all economically feasible steps have been taken to minimize the essential use and any associated emission of the controlled substance; and the controlled substance is not available in sufficient quantity and quality from the existing stocks of banked or recycled controlled substances." When submitting a nomination to the Secretariat, the U.S. must be able to demonstrate that the proposed uses meet these criteria. The burden of proof is on the nominating country, and applications failing to prove that these criteria have been met will be rejected by the Parties. Thus, it is incumbent upon applicants to ensure that all applications are supported by complete and detailed documentation including the types of information outlined in the Handbook on Essential Use Nominations to allow EPA to determine whether to submit the applications as nominations, and to assist EPA in presenting a strong and credible case before the Parties and the recommending Panel for those nominations.

All requests for nominations submitted to EPA must present the following information in the manner prescribed in the Panel Handbook. EPA will not forward incomplete or inadequate nominations to the Montreal Protocol Secretariat for consideration, and therefore recommends that applicants make every effort to provide the requested information. Applicants should contact the Essential Use Program Manager to obtain a copy of the Handbook on Essential Use Nominations, prepared by the Panel, for

guidance on preparing nominations. As noted in that book, nominations should, at a minimum:

- (1) Provide details of the type, quantity and quality of the controlled substance that is requested to satisfy the use that is the subject of the nomination. Indicate the period of time and the annual quantities of the controlled substance that are requested.
- (2) Provide a detailed description of the use.
- (3) Explain why this use is necessary for health and/or safety, or why it is critical for the functioning of society.
- (4) Explain what other alternatives and substitutes have been employed to reduce the dependency on the controlled substance for this application.

(5) Explain what alternatives were investigated and why they were not considered adequate (technically, economically or legally).

- (6) Describe the measures that are proposed to eliminate all unnecessary emissions. At a minimum, this explanation should include design considerations and maintenance procedures.
- (7) Explain what efforts are being undertaken to employ other measures for this application in the future.
- (8) Explain whether the nomination is being made because national or international regulations require use of the controlled substance to achieve compliance. Provide full documentation including the name, address, phone and fax number of the regulatory authority requiring use of the controlled substance and provide a full copy or summary of the regulations. Explain what efforts are being made to change such regulations or to achieve acceptance on the basis of alternative measures that would satisfy the intent of the requirement.
- (9) Describe the efforts that have been made to acquire stockpiled or recycled controlled substance for this application both from within your nation and internationally. Explain what efforts have been made to establish banks for the controlled substance.
- (10) Briefly state any other barriers encountered in attempts to eliminate the use of the controlled substance for this application.

(11) Demonstrate consistency with CAA provisions on essential uses.

All nominations should be sent to: Karen Metchis, Program Manager, Essential Use Exemptions, Mail Stop 6205J, Environmental Protection Agency, Washington, DC 20460, FAX: (202) 233–9577, Phone: (202) 233–9193

EPA will work with submitters, other interested federal agencies, and outside

experts to review this information and forward nominations to the Protocol's Secretariat for consideration as appropriate and consistent with any CAA limitations.
